

# UTILITY GATES

## TOUGHY UTILITY GATES - SERIES 2

FenWall's Toughy Utility Gates are perfect for trash corals and service yards offering security and durability while concealing unsightly trash dumpsters from your customer's view. Gates are constructed from a sturdy 2" x 3" tube steel frame with 1" x 2" intermediate support structure with various infill and hardware options. Infill is mounted within the steel frame utilizing a stop and angle assembly for a finished appearance.

Toughy Utility Gates include 4" x 6" aluminum tube columns to swing from with a minimum of 3 heavy duty stainless steel butt hinges per leaf. Choose from Corrugated Aluminum, or PVC Composite or Treated Wood Planks and continue your brand-specified color on your utility gates by choosing custom powder coat for recognizable and consistent branding for one or many locations. Toughy Utility Gates are often purchased with FenWall's Trash Coral Assembly. Contact FenWall today for more information.
