

UTILITY GATES

VENETIAN UTILITY GATES - SERIES 1

FenWall's Venetian Utility Gates are perfect for trash corals and service yards and offer a decorative approach at concealing unsightly trash dumpsters from your customer's view. Gates are constructed from a sturdy 2" x 3" tube steel frame with louver infill panels. Louvers are constructed with a 2" blade mounted into a sub-frame that is welded to the main frame.

FenWall's Venetian Utility Gates include 6" diameter posts to swing from with 7" greased sleeve hinges for years of problem free hinging. Continue your brand-specified color on your utility gates by choosing the color of powder coat for recognizable and consistent branding for one or many locations. Venetian Utility Gates are often purchased with FenWall's Trash Coral Assembly. Contact FenWall today for more information.
