

Beauty & Function

A High-Performance, Fiber-Cement Panel System with a Patented, Ceramic-Coating for a Long-Lasting Finish and Warranty

Ceraclad South

Ceraclad is a ceramic-coated siding assembly engineered for residential and commercial buildings. Manufactured in Japan for more than 30 years, the Ceraclad system integrates proven rainscreen technology with a hidden fastener system to create a highly durable ventilated façade. The end result is a high-performance wall assembly that provides long-term protection against water infiltration and low maintenance wall surfaces with a long lasting, beautiful appearance.

Ceraclad utilizes a two-coat finish system: the color of your choice plus a protective/ceramic-coating to provide additional UV resistance and color stability which sets Ceraclad apart from the competition. Ceraclad offers a broad palette of rich colors and unique textures, all backed by a 50 Year Limited Warranty and a 20 Year Limited Color Warranty for our factory-finished ceramic coated panels.
